

$ab = ba \rightarrow \text{group } \mathbb{Z} \times \mathbb{Z}$
 $\frac{S \vee S'}{\mathbb{Z} \times \mathbb{Z}}$
 $S \vee S'$
 $\frac{S \vee S'}{\mathbb{Z} \times \mathbb{Z}}$
 $T: \mathbb{Z} \times \mathbb{Z}$
 $T \circ \mathbb{Z} \times \mathbb{Z}$
 $f \circ \mathbb{Z} \times \mathbb{Z}$

[illegible]

S^2 : 0-cell $\downarrow$ $\mathbb{Z}$
 $\mathbb{Z}$ -cell $\mathbb{Z}$

R/P^2 : 0-cell: $\mathbb{Z}$
 $\mathbb{Z}$ -cell: $\mathbb{Z}$
 $\mathbb{Z}$ -cell $\mathbb{Z}$

$ab^{-1}b^{-1} = 0$
 $a, b \mid ab = b^{-1}$

The image contains several hand-drawn sketches of biological structures on a grid background. On the left, there is a horizontal row of five oval cells, each with a small circle inside, representing a developing embryo. In the center, there is a single cell with a large, irregular nucleus containing a four-lobed structure, possibly a nucleus with four nucleoli. To the right, there is a cell with a large, irregular nucleus containing a smaller, more complex structure. At the bottom, there is a horizontal line with several tick marks, possibly representing a scale or a timeline.

$$\int \frac{f(z)}{g(z)} dz \quad \leftrightarrow \quad \frac{2\pi \cdot i \cdot \text{Res}}{1}$$
