Rational - Canonical Form
Jordan - Canonical Form
Smith - Canonical Form.

Positive form
bilinear form
Matrix Analysis. (Matrix Norm)
Determinant.

Fourier series
Integral and differential form
More topics in series and sequence of functions.
Differential equation.

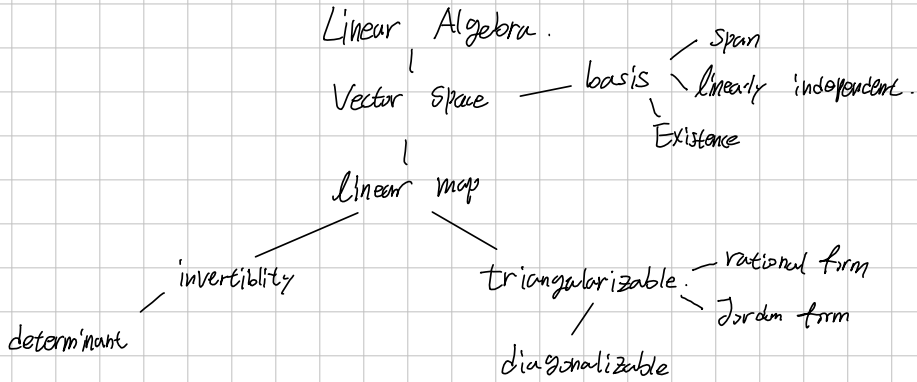

Goal

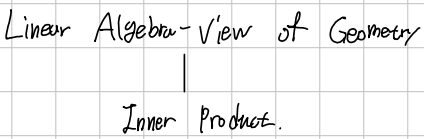

1. All Problem in:
   Dummit,
   Hoffman,
   Rudin, KKG
   Munkres,
   Hutcher,
   O'neil,
   Silverman.

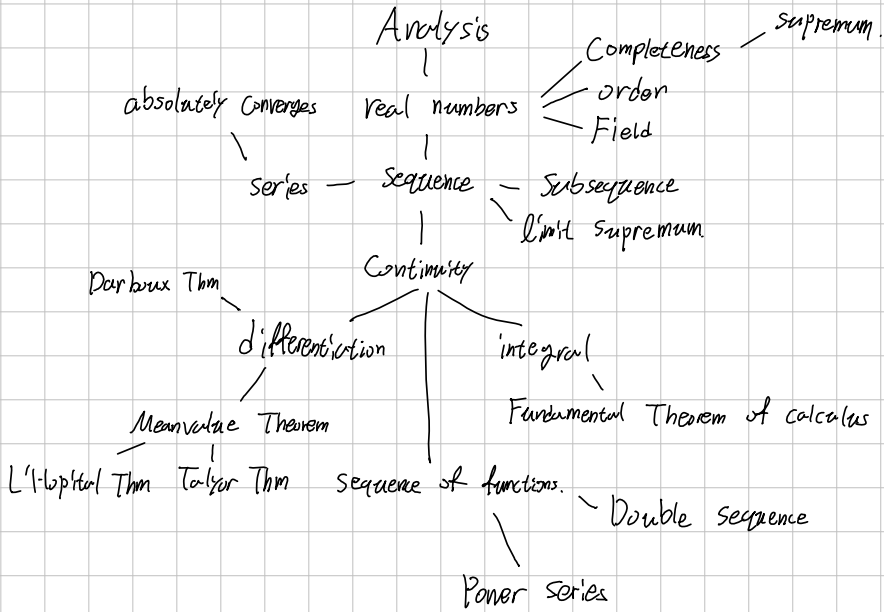

Solve, and obtimize in my own language.

Every study papers should be written under the fixed rules;
Prop: Proposition. A useful fact
Lemma: Lemma.
Thm: Theorem. A main result in the topic.
Cor.: Corollary.

Main Process to understand:

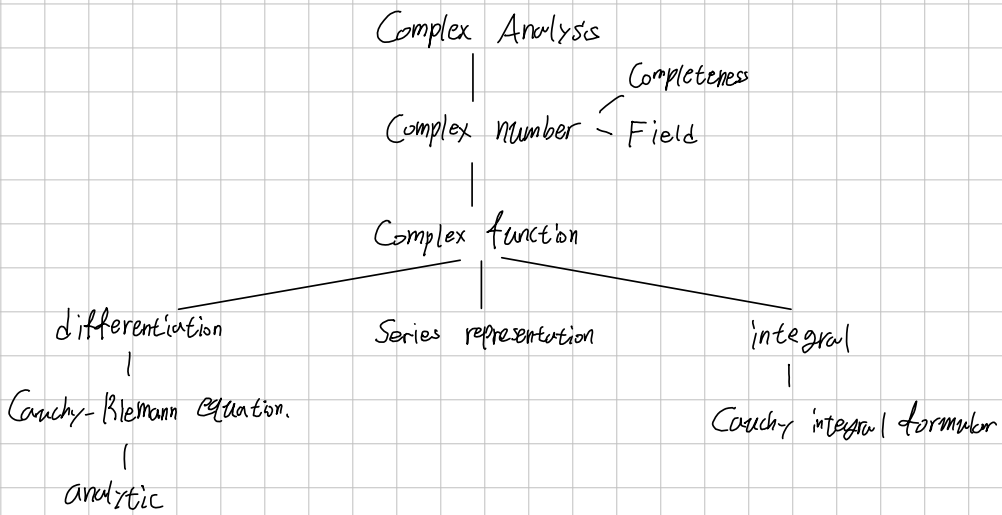

Linear Algebra.
Vector Space
basis
Span
linearly independent.
Existence
linear map
invertibility
determinant
triangularizable.
rational form
Jordan form
diagonalizable
