

[illegible][illegible]

$\mathbb{R}/\mathbb{P}^2$: 0-cell: $\{v\}$
 1-cell: $\{x, y\}$
 2-cell: $\{z\}$

A collection of hand-drawn sketches on grid paper. At the top left is a circle containing a sine wave, with two points on its circumference connected by a diagonal line segment. Below it is a five-petaled flower-like shape. To the right are handwritten notes: " $\pi \times y + z$ ", " $\cup \pi \times y$ " with a downward arrow, " $\cup (0,0,z)$ ", and " $(\frac{1}{2}, \frac{\sqrt{3}}{2})$ ". Further right is a square with arrows on its sides. In the center is a complex looped shape with several lobes. Below that is an oval with concentric circles inside. At the bottom left is a partial sketch of a face with a smiley face. At the bottom right is a large, rounded shape resembling a helmet or dome, next to a stylized letter 'S'.

$$Z = \frac{1}{2} + 4i$$

$$K_1 = \frac{1}{2} + 4i$$

$$K_2 = \frac{1}{2} + 4i$$

$$\int \frac{1}{z} dz$$

$$\frac{2\pi i \cdot \frac{1}{2}}{1}$$
